PROFESSIONAL SUMMARY

React Native and Frontend Engineer with 6+ years of experience building scalable mobile applications, frontend systems, and engineering workflows across product startups and high-scale consumer platforms. Strong expertise in React Native, TypeScript, frontend architecture, app releases, testing infrastructure, and developer productivity.

Currently working as a Founding Engineer at a Sports AI startup, leading development of an Expo-based mobile application from scratch, integrating payment systems, analytics SDKs, AI-powered workflows, and engineering quality tooling. Previously contributed at Dream11 across Software Engineering roles, building gamification-focused frontend experiences, improving code quality through automation, increasing Jest test coverage, and leading mobile automation initiatives using Java and Appium.

Known for combining product thinking with engineering quality, writing maintainable frontend systems, and taking ownership across the complete SDLC lifecycle.

KEY COMPETENCIES

Frontend & Mobile: React Native, React.js, TypeScript, JavaScript, Expo	Engineering: SDLC, GitHub Actions, CI/CD, Code Quality, App Releases	Development: Responsive UI, API Integration, Cross-Platform Development
---	--	---

PROFESSIONAL EXPERIENCE

DreamPlay

Jan 2026 - Present

Founding Engineer / React Native Developer

- Built and launched a React Native Expo application from scratch for a Sports AI platform.
- Integrated CleverTap, in-app purchases (IAP), analytics tooling, and production-ready mobile workflows.
- Developed GitHub Actions pipelines for linting and automated code quality checks.
- Created reusable Cursor and Claude engineering rulebooks to improve onboarding and junior developer productivity.
- Partnered with customer support teams to implement AI-driven workflows summarizing app reviews and support issues.

Dream11

Nov 2021 - Dec 2025

SDE-1 / Frontend Engineer

- Built and enhanced frontend UI experiences for the Gamification & Gratification team using React and React Native.
- Improved engineering quality by writing cleanup scripts, increasing Jest unit test coverage, and optimizing maintainability.
- Contributed across frontend architecture, production releases, debugging, and cross-functional product delivery.

Zeus Learning

June 2019 - Oct 2021

QA Engineer

- Performed manual, regression, and UI testing for Discovery, an ed-tech learning platform.
- Ensured stable and high-quality releases through structured testing workflows.

EDUCATION

Bachelor of Engineering

2015-2019

Vidyavardhini's College of Engineering and Technology
